## Join us for a highly interactive day of learning and the practical application

### Background:

Organisations are seeking improvement and quality across many areas except that which is the most important - the quality of their thinking!

Cutting and down-sizing are reactive measures that rarely lead to beneficial outcomes beyond the short term.

*The Six Thinking Hats* approaches will help address current and pressing organisational issues *and* identify new and emergent opportunities with a proactive focus on design, rather than with the reductionist approaches that are so common.

The Hats are used to look at issues from multiple perspectives. The methods help us to move beyond our habitual thinking styles and develop more rounded views of given situations.

The methods reduce wasteful argument from those with divergent views and get participants to work together in a more collaborative and productive manner.

### The Day:

*The Six Thinking Hats* create a common language, encourage co-operation, exploration and improve mental agility by getting teams thinking and working together.

Upon conclusion of this session participants will have:

- Developed a sound understanding of multiple thinking styles,
- the ability to plan & facilitate outcome oriented meetings,
- the ability to generate genuinely new ideas using lateral thinking,
- the ability to design and lay out a sound thinking process, for all situations,
- become a more collaborative, thorough & creative thinker.
